GeoLabPortal - Master Question Bank

Chapter 1: Exogenic Processes and Resultant Landforms (5 Marks)

Question 1: Explain the work of wind in arid regions and the major landforms formed by wind erosion and deposition with neat diagrams.

Model Answer: Wind action is most prominent in arid and semi-arid desert regions due to sparse vegetation and loose sandy soil. The major erosional landforms include Yardangs, Zeugen, and Mushroom Rocks (Pedestal Rocks).

Page 2: Glacial Landforms & River Systems

Question 2: Describe the three courses of a river and the typical landforms created in the upper course.
